

CALCITE FIORE

Lime based internal breathable mould inhibiting Paint

ADVANTAGES

- STOPS MOULD GROWTH
- LONG TERM PROTECTION
- ECOLOGICAL
- BREATHABLE
- HIGH COVERAGE
- SIMPLE APPLICATION
- CAN BE COLOURED

Mineral based, breathable, ecological PAINT made from slaked lime. Provides high quality decoration with smooth matt effect. It has a purely natural formulation that is flame-retardant and disinfectant with excellent long term resistance to mould and bacteria

Applications:

- Internal walls
- Internal ceilings
- Garages
- Basements
- Washrooms

WARNINGS The paint can be coloured but only with light pastel colours.

APPLICATION MODE

- Prepare surface by wiping dust and mould off with suitable biocide.
- Open pail, the paint appears to be very dense, putty like, this is normal.
- Place some paint putty into new clean pail.
- Mix well with high amount of water, about 50% to make 1st primer coating.
- Apply primer coating to all surfaces and allow to dry.
- Place rest of paint putty in
- If necessary apply 3rd coat at right angles to previous coat.
- Allow a minimum of 6-8 hours between applications.
