

TECHNICAL DATA SHEET

BOND LT 51

LIQUID ADDITIVE FOR MORTARS

DESCRIPTION AND TECHNICAL CHARACTERISTICS

White liquid based of synthetic polymer tension active additives modified and hydrophobic. Improves adhesion, impermeability and elasticity.

APPLICATION

Add BOND LT 51 with mortar, using an electric mixer at low speed. Mix until obtaining an homogeneous paste, free of clots. Let it rest for a few minutes than apply with a brush or a trowel.

APPLICATION FIELDS

Use in substitution of mixing water, in osmotic cements, and mortars.

Impermeabilization contrapressure	Up to 14 atm
P/s.app.	1,0±0,1 gr/cm ³
Vapour permeability	8,58 X10 ⁻¹¹
Colour	White
Chemical aggression resistance	Up to PH3
Storage	12 months in a dry place
Packaging	5Ltr or 25 Ltr
